

Metals & Mining/Finland, April 5, 2023 Company update

Strong production figures for Q1

Endomines reported strong production figures for Pampalo as the production increased 215% y/y during Q1 2023. In our view, the company is making good progress in alignment with its revised strategy and the favorable development is further supported by the current strong gold market.

Pampalo production increased 215% year-on-year

Endomines released an operational update for Q1 2023 that included updated gold production figures for Pampalo. The company was able to produce 3588 ounces of gold during Q1 2023 which was 215% higher when comparing to last year (1137 ounces in Q1 2022). In addition to strong production figures, the company's drilling program in the Karelian gold line developed according to plans during the first quarter. Endomines has completed roughly half of the planned drilling in the Korvilansuo area, and the results are expected to be published in April-July.

We increase our production estimate for H1 2023

We increase our $\dot{H}1$ 2023 production estimate to 6893 ounces (5817 ounces) driven by the strong production figures for Q1. Endomines expects production increase of 35–55% for FY 2023 when comparing to FY 2022, our current production estimate is at the top end of the guidance range. There is further upside to our production estimate if the company can maintain the rate of production achieved in Q1 over the upcoming quarters. We also increase our profitability estimate for 2023 driven by the increased volumes in the first half and overall improved profitability for the full year due to the combination of lower energy prices and higher gold prices in relation to 2022.

BUY with a target price of EUR 6.5

Our view of the company remains unchanged, Endomines is implementing its strategy effectively in Finland and is benefitting from the strong gold market. However, we continue to see risks associated with the value realization of the company's asset portfolio in the United States. In addition, there is limited visibility regarding the company's exploration activities and the future Pampalo production. Due to the existing uncertainties, we base our valuation on the lower end of our SOTP-based valuation range. We retain our BUY-rating and TP of EUR 6.5.

Important Disclosures

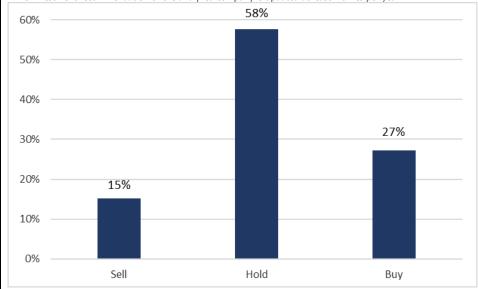

Evli Research Partners Plc ("ERP") uses 12-month target prices. Target prices are defined by utilizing analytical techniques based on financial theory including (but not limited to) discounted cash flow analysis and comparative valuation. The selection of valuation methods depends on different circumstances. Target prices may be altered on the basis of new information coming to light in the underlying company or changes in interest rates, changes in foreign exchange rates, other securities prices or market indices or outlook for the aforementioned factors or other factors that may change the conditions of financial markets. Recommendations and changes by analysts are available at <u>Analysts' recommendations and ratings revisions</u>.

Investment recommendations are defined as follows:

Target price compared to share price Recommendation

< -10 % SELL -10 - (+10) % HOLD > 10 % BUY

ERP's investment recommendation of the analyzed company is updated at least 2 times per year.

The graph above shows the distribution of ERP's recommendations of companies under coverage in 11th of May 2020. If recommendation is not given, it is not mentioned here.
