Publication date:	This key information document was drawn up on 1.1.2023.

This PRIIP product has been approved in Finland. The Fund Management Company is authorized in Finland and regulated by the Finnish Financial Supervisory Authority.

WHAT IS THIS PRODUCT?

Type

The Fund is a mutual fund compliant with the UCITS Directive and invests its assets in bonds with first-class credit ratings issued or guaranteed by member states of the euro zone.

Investment term

The recommended holding period is at least 3 years. Fund units may be subscribed for and redeemed on every Finnish banking day excluding those banking days on which the net asset value of the Fund or its investments cannot be determined due to foreign public or bank holidays or if the Management Company has temporarily suspended the calculation of the value of the fund units due to exceptional conditions described in the Fund rules. A list of days on which the trading of fund units is not possible is available from the Management Company and on the Management Company's website.

Objectives

- The fund's target is to exceed the return of the benchmark index.
- The fund will invest primarily in euro-denominated bonds issued or guaranteed by governments or public corporations in the euro area. The value of the indicator (modified duration) that describes the interest rate risk of the fund's fixed income investments may range between 0 and 10 years, but is typically 4-7 years. Variations in the general interest rate level affect the fund's performance much more than is the case with money market funds, and during increases in the general interest rate level the fund may produce negative returns. The fund may also invest its assets in derivatives contracts both for hedging purposes and within the fund's investment strategy.
-
- The benchmark of the fund's return is the ICE BofAML Euro Government Index (EG00). The fund's investment style is active and the fund does not follow the benchmark index in its investment operations. Consequently, the fund's performance may deviate from the performance of the benchmark index. The fund's base currency is the euro. In the unit series, a minimum of 3% of the net asset value of a fund unit will be distributed annually as dividends.

Intended retail investor

The Fund suits private investors i) who seek more stable returns than those of equity investments, and iii) who wish to invest in a well-diversified and first-class portfolio of government bonds. Investors must have a sufficient understanding of the fund's investments and be prepared to bear the potential financial risk associated with the investment. The fund is not suitable as a short-term investment and the investment horizon should be at least 3 years.

The Fund's most recent annual and semi-annual reviews, the most recent fund unit values and additional information on the Fund are available at www.evli.com/funds or from the Management Company free of charge, and through a local distributor or service provider in other Member States of the EU/EEA in which the Fund is marketed. Some or all of the information is available in Finnish, English and Swedish. The custodian of the Fund is Skandinaviska Enskilda Banken AB (publ) Helsinki Branch.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The overall risk indicator expresses the level of risk of this product compared to other products. It indicates how likely the product is to lose money because of market events or because the product developer is unable to pay the investor. On a scale from 1 to 7, the risk category of the product is defined as 2, which is low risk class. Potential future losses are rated at low, and poor market conditions very unlikely to affect the ability of the management company to pay the investor. The risk that the risk indicator may not necessarily fully take into account is derivatives risk, that is, the use of derivatives to obtain additional returns may increase the fund's risk and return expectation. The use of derivatives for hedging purposes or for risk management may reduce risk and return expectation. The use of derivatives may increase counterparty risk and operational risk.

Be aware of currency risk. The currency of this unit series may be different from that of your country. As the investor may receive payments in the currency of this unit series and not that of the investor's country, the final return will depend on the exchange rate between these two currencies. This risk is not considered in the indicator shown above.

This product does not include capital protection against market risk nor capital guarantee against credit risk. This product is not secured against future market developments, which means that you may lose part or all of the investment. If you cannot be paid, you may lose the entire investment.

Performance Scenarios

The presented figures include all costs related to the product, but do not necessarily include all costs paid by you to an advisor or distributor. The figures do not take into account your personal tax situation, which may also affect the returns you receive.

This table shows the money you could get back over the next years, under different scenarios, assuming that you invest EUR 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and investment period. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

EUR 10,000 investment		If you exit after one year	If you exit after the recommended investment horizon
Scenarios			
Stress	What you might get back after costs	7 350 EUR	8 870 EUR
	Average return each year	-26.5 %	-3.9 %
Unfavorable	What you might get back after costs	9 660 EUR	9 390 EUR
	Average return each year	-3.4 %	-2.1 %
Moderate	What you might get back after costs	10 170 EUR	10 950 EUR
	Average return each year	1.7 %	3.1 %
Favourable	What you might get back after costs	11 050 EUR	12 210 EUR
	Average return each year	10.5 %	6.9 %

WHAT HAPPENS IF EVLI FUND MANAGEMENT COMPANY LTD IS UNABLE TO PAY OUT?

The insolvency of the Management Company will not necessarily cause losses to you. The assets of the Fund and of the Fund Management Company are held separately. The custodian of the Fund's assets is Skandinaviska Enskilda Banken AB (publ) Helsinki Branch. The investment is not covered by any investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

Persons who sell or advise on this product to you may charge you for other costs. In this case, the person in question will provide you with information on the relevant costs and will show the impact all costs will have on the investment over time.

Costs over Time

The tables show the sums used from the investment to cover diverse types of costs. These sums depend on the amount of the investment and how long the product is held. The amounts shown here are illustrations based on an example investment amount and different investment periods. The assumption is that

- In the first year you would get back the amount invested (0 % annual return). For the other holding periods the assumption is that the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	If you exit after one year	If you exit after the recommended holding period
Total costs	32 EUR	99 EUR
Annual cost impact (*)	0.3 %	0.3 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.4% before costs and 3.1% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after one year
Entry costs	We do not charge an entry fee ie. subscription fee.	0 EUR
Exit costs	We do not charge an exit fee ie. redemption fee	0 EUR
Ongoing costs annually		
Management fees and other administrative or operating costs	This is an estimate based on actual costs over the last year.	30 EUR
Transaction costs	This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	2 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product	0 EUR

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period is at least 3 years.

The recommended holding period is based on the fund's risk-reward profile. Fund units may be redeemed on every Finnish banking day excluding those banking days on which the net asset value of the Fund or its investments cannot be determined due to foreign public or bank holidays or if the Management Company has temporarily suspended the calculation of the value of the fund units due to exceptional conditions described in the Fund rules. A list of days on which the trading of fund units is not possible is available from the Management Company and on the Management Company's website.

HOW CAN I COMPLAIN?

If you wish to express your dissatisfaction with the product or the service provided, please contact Evli's Investor Service or your service provider. Contact information: Evli Plc, Investor Service, PO Box 1081, FI-00101, +358 (0)9 4766 9701, info@evli.com. You can also leave a message on our website: www.evli.com/en/contact-us. More detailed information on handling client feedback at Evli is available at the address www.evli.com/en/client-information.

OTHER RELEVANT INFORMATION
